

IET Smart Cities

Call for Papers

Submission Deadline: 15th August 2020 | Publication Date: December 2020

Editors-in-Chief:

Prof Chai K. Toh, GLG, USA, National Tsing Hua University, Taiwan

Prof William Webb, Webb Consulting, UK

Special Issue on:

Selected Papers from the International Conference on Smart Living and Public Health (ICOST)

The International Conference on Smart Living and Public Health (ICOST, <https://www.icost-society.org>) provides a premier venue for the presentation and discussion of research in the design, development, deployment, and evaluation of AI for health, smart urban environments, assistive technologies, chronic disease management, and coaching and health telematics systems. The conference succeeded in bringing together a community from different continents over more than a decade and half and raised the awareness of frail and dependent people's quality of life in our societies.

ICOST focuses on analyzing impact of ICTs in public health and wellbeing of citizens all over the world. The 18th edition of the conference aims at bridging the gap between developed and developing countries facing health and wellbeing challenges with this edition theme "The Digital Technologies Impact on Public Health in Developed and Developing Countries".

The ICOST'2020 edition of the conference was intended to be hosted in Hammamet, Tunisia during the period of 24-26 June 2020 but was finally hosted virtually at the same dates given the COVID-19 situation faced on 2020.

Authors of selected high-qualified papers from the conference will be invited to submit extended versions of their original papers and contributions (50% extensions of the contents of the conference paper).

We also welcome submissions of papers which fall within the conference theme and more broadly the idea of Smart Health within the context of Smart Cities.

To submit your paper and for more information about the journal please visit:
