# Photovoltaics

## Books and eBooks

Photovoltaic (or solar) cells directly convert sunlight into electric energy. This renewable energy source is a key pillar of an emerging clean energy system needed to prevent disastrous climate change. Capacities are growing steadily, possibly reaching 900 GW globally in 2021.

Intense Research and Development efforts are going into improving the efficiency and durability of the different solar cell types. The IET book titles included below, convey the state of the art of key technologies to boost PV technology.

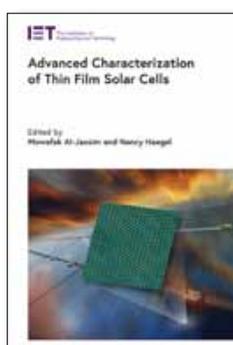

### Advanced Characterization of Thin Film Solar Cells

Edited by Mowafak Al-Jassim, Nancy Haegel

Polycrystalline thin-film solar cells have reached a leveled cost of energy that is competitive with all other sources of electricity. This book provides researchers with a concise overview of the status of thin-film solar cell technology and characterization. Chapters describe material systems and their properties and then provide an in-depth look at relevant characterization methods and the learning facilitated by these.

2020 / £125 / \$165 / PBPO166  
ISBN-13: 978-1-83953-023-4

### Bifacial Photovoltaics: Technology, applications and economics

Joris Libal, Radovan Kopecek

*Bifacial Photovoltaics: Technology, applications and economics* provides an overview of the history, status and future of bifacial PV technology with a focus on crystalline silicon technology, covering the areas of cells, modules, and systems. In addition, topics like energy yield simulations and bankability are addressed.

2018 / £115 / \$150 / PBPO107  
ISBN-13: 978-1-78561-274-9

### Hydrogen Passivation and Laser Doping for Silicon Solar Cells

Brett Hallam, Catherine Chan

Photovoltaic electricity generation is a rapidly growing industry, and a key pillar of a decarbonized energy system. Lasers are used to dope the semiconductor layers in solar cells, and it is necessary to passivate these laser-induced structures to prevent premature charge carrier recombination. This book conveys passivation techniques.

2021 / £125 / \$165 / PBPO134  
ISBN-13: 978-1-78561-623-5

### Reliability of Power Electronics Converters for Solar Photovoltaics Application

Ahteshamul Haque, Frede Blaabjerg, Huai Wang, Yongheng Yang and Zainul Abdin Jaffery

A hands-on, case study-backed reference of control strategies, fault classification mechanisms, and reliability analysis methods for PV modules, power electronic converters, and grid-connected PV systems. Written by an international team of researchers with excellent backgrounds in academia and industry.

2021 / £110 / \$145 / PBPO170  
ISBN-13: 978-1-83953-116-3

[Link >>](#) The IET Shop - Reliability of Power Electronics Converters for Solar Photovoltaic Applications

## Silicon Solar Cell Metallization and Module Technology

Thorsten Dullweber, Loic Tous

Metallization is a key step in manufacturing of efficient and reliable solar cells. Written by world-wide renowned experts, this work covers metallization technologies, before describing ongoing R&D activities for the most relevant silicon solar cells metallization technologies. Later chapters deal with aspects of solar cell modules.

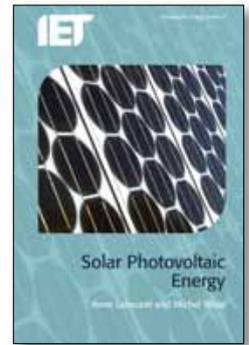

2021 / £130 / \$170 / PBPO174  
ISBN-13: 978-1-83953-155-2

[Link »](#) The IET Shop - Silicon Solar Cell Metallization and Module Technology

## Solar Photovoltaic Energy

Anne Labouret and Michel Viloz

*Solar Photovoltaic Energy* is a professional manual for designers, installers and managers and gives a detailed account of the physical phenomena as well as the available technology and technology currently in development for photovoltaic energy.

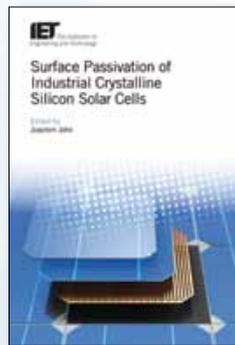

2010 / £78 / \$140 / PBRN0090  
ISBN-13: 978-1-84919-154-8

## Surface Passivation of Industrial Crystalline Silicon Solar Cells

Edited by Joachim John

This timely overview of silicon solar cell surface passivation, written by the leading experts in the field, is a key read for students and researchers working with silicon solar cells, as well as solar cell manufacturers.

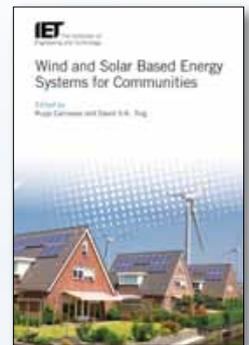

2018 / £115 / \$150 / PBPO106  
ISBN-13: 978-1-78561-246-6

## Wind and Solar Based Energy Systems for Communities

Edited by Rupp Carriveau, David S-K. Ting

This book brings together topics on the emerging area of community energy technology, covering key areas from generation through to considerations for the entire system, with an emphasis on the popular energy sources of wind power and solar power.

2018 / £100 / \$160 / PBPO130  
ISBN-13: 978-1-78561-544-3

# How to order

## Individual Book Sales

Place your order for print or eBooks from the IET:

### Online:

Print books: [www.theiet.org/books](http://www.theiet.org/books)

eBooks: [www.ietdl.org/ebooks](http://www.ietdl.org/ebooks)

### Or contact customer service:

Email: [sales@theiet.org](mailto:sales@theiet.org)

Phone: +44 (0)1438 767328

Fax: +44 (0)1438 767375

Post: The Institution of Engineering and Technology,  
PO Box 96, Stevenage SG1 2SD, UK

### \*SPECIAL OFFER

Purchase any of the titles in this leaflet from the IET Bookshop and receive a discount of 20%. Simply apply the code: ENERGY20 at the checkout. – Offer expires 31 December 2021.

Please note that this discount cannot be applied in addition to the IET member discount.

### MEMBER DISCOUNTS

IET members are entitled to a discount on the first copy ordered of any book and need to quote their membership number when ordering.\*\* If more than one copy of a title is ordered then the discount will be applied to the first copy only. Books purchased with a member discount should be for personal use only and should not be resold.

\*\* Please note, the member discount set out above cannot be used in conjunction with any other discounts or promotions offered by the IET from time to time. Any discount/promotion codes used will be void and the member discount will take precedence.
